ADDITIONAL DETAILS:

Using various display systems, production techniques, and compositional strategies to discover immersive media experiences for moving-image and sound based artwork. Students will learn to produce stereoscopic-3D images, utilize multi-channel video and sound systems, and be introduced to 3D modeling, game engine and VR hardware. Primary course goals: to develop an art historical foundation for our inquiry, conduct experiments through in-class labs, and produce / present a final project.

Catalog Description:
Taught by UW faculty and visiting artists, engineers, scientists, and humanities scholars.

Credits: 5.0
Status: Active
Last updated: June 24, 2019 - 9:02pm
