ARTICLE BY DXARTS ALUMNUS NICOLÁS VARCHAUSKY
IN LEONARDO MUSIC JOURNAL, VOLUME 28

Submitted by Ewa Trebacz on December 5, 2018 - 10:04am

The Migration of Data and Other Life Forms, a work by DXARTS Alumnus Nicolás Varchausky has been featured in the latest issue of Leonardo Music Journal.

ABSTRACT

The article discusses a sound installation premiered during the 70th anniversary of the New Music Summer Courses in Darmstadt. The project proposes a dialogue between the archive of the Internationales Musikinstitut Darmstadt (IMD), which preserves the voices of contemporary music composers who lectured at the summer courses, and Archivo PAIS, the author's personal archive of anonymous voices of street vendors, informal preachers, institutional announcers and street artists. Speech analysis software, transducers, modified stethoscopes and a 15-meter-long by 4-meter-high fence were used to reflect on issues of survival, access and displacement though sound.
